BennyFi

Pledge the Yield, Not the Principal

Let's Start

The Problem:

Principal Loss

©Copyright BennyFi Inc, 2019 - 2024. Confidential - Do Not Distribute

The Solution:

Utilize YIELD to shield PRINCIPAL

©Copyright BennyFi Inc, 2019 - 2024. Confidential - Do Not Distribute

BennyFi ™
ORCHESTRATES yield to create a new, composable source of funding that safe-guards principal

©Copyright BennyFi Inc, 2019 - 2024. Confidential - Do Not Distribute

A Simple, Powerful Mechanism

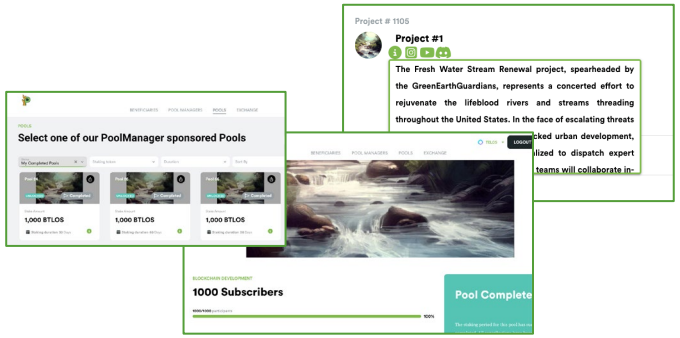
Aggregate Principal within a pool

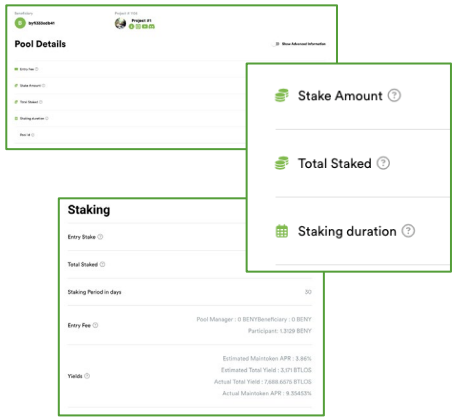
+

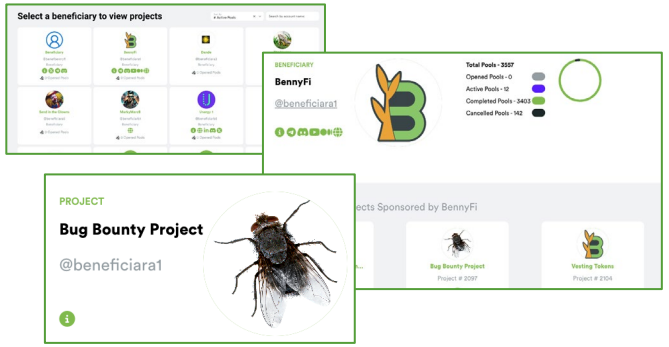
Stake to Yield Source

+

Distribute the Yield as funding

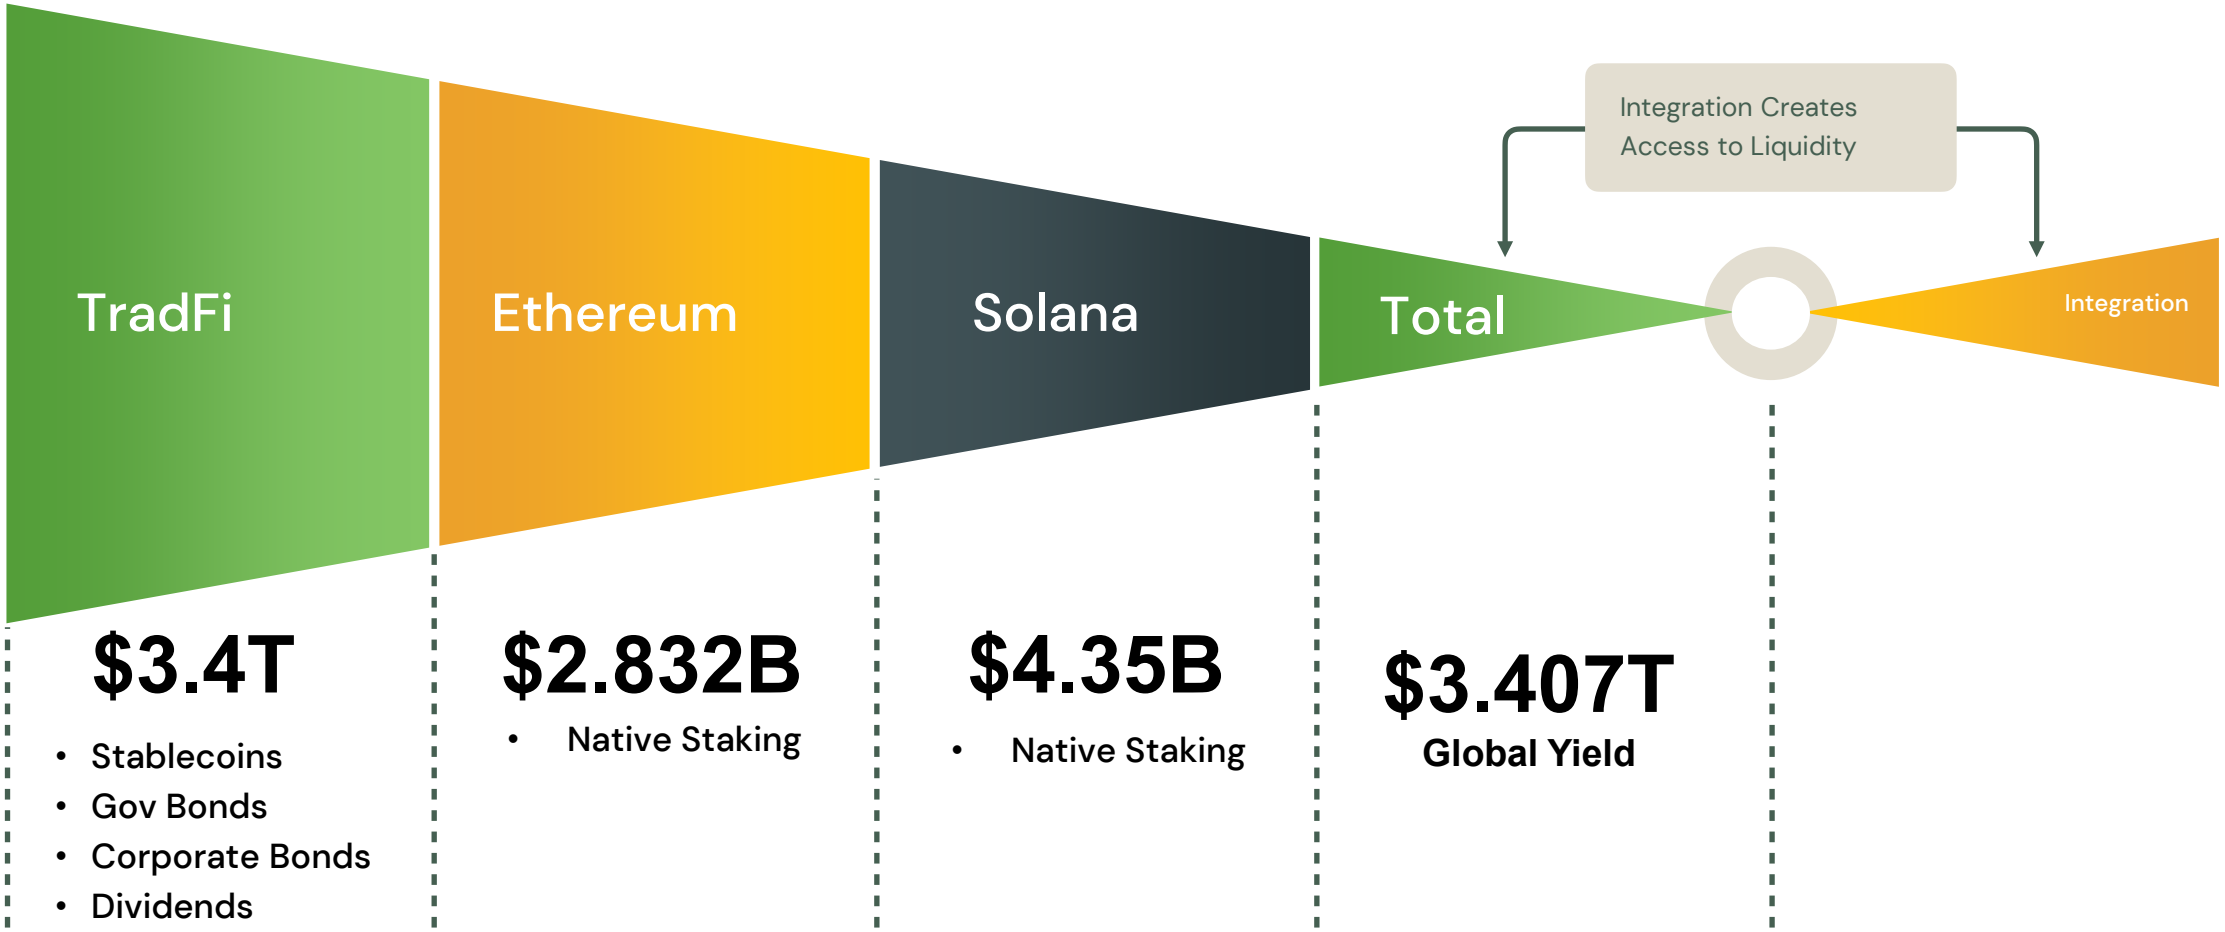






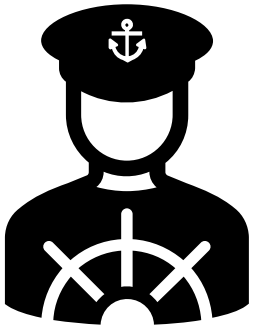
©Copyright BennyFi Inc, 2019 - 2024. Confidential - Do Not Distribute

Addressable Market



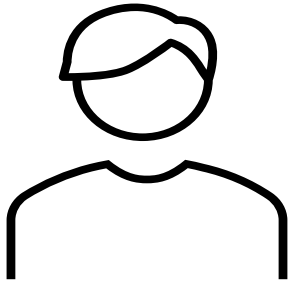
©Copyright BennyFi Inc, 2019 - 2024. Confidential - Do Not Distribute

BennyFi™ User Roles



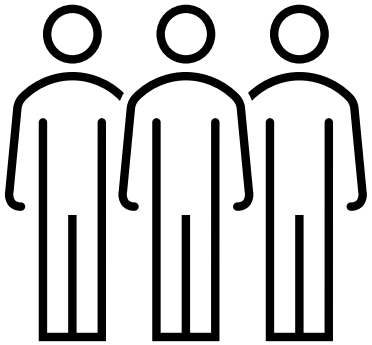
Pool Manager

Pool Managers create Pools and are the governing members.



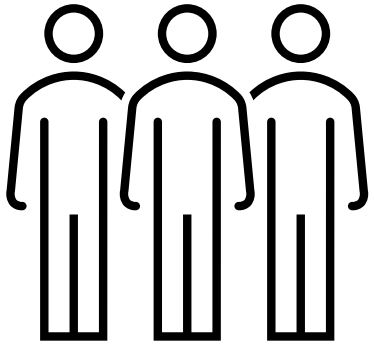
Beneficiary

Beneficiaries are the recipients of yield as specified by the terms of the pool.



Participants

Participants stake tokens to a pool under the terms specified in the pool's terms.

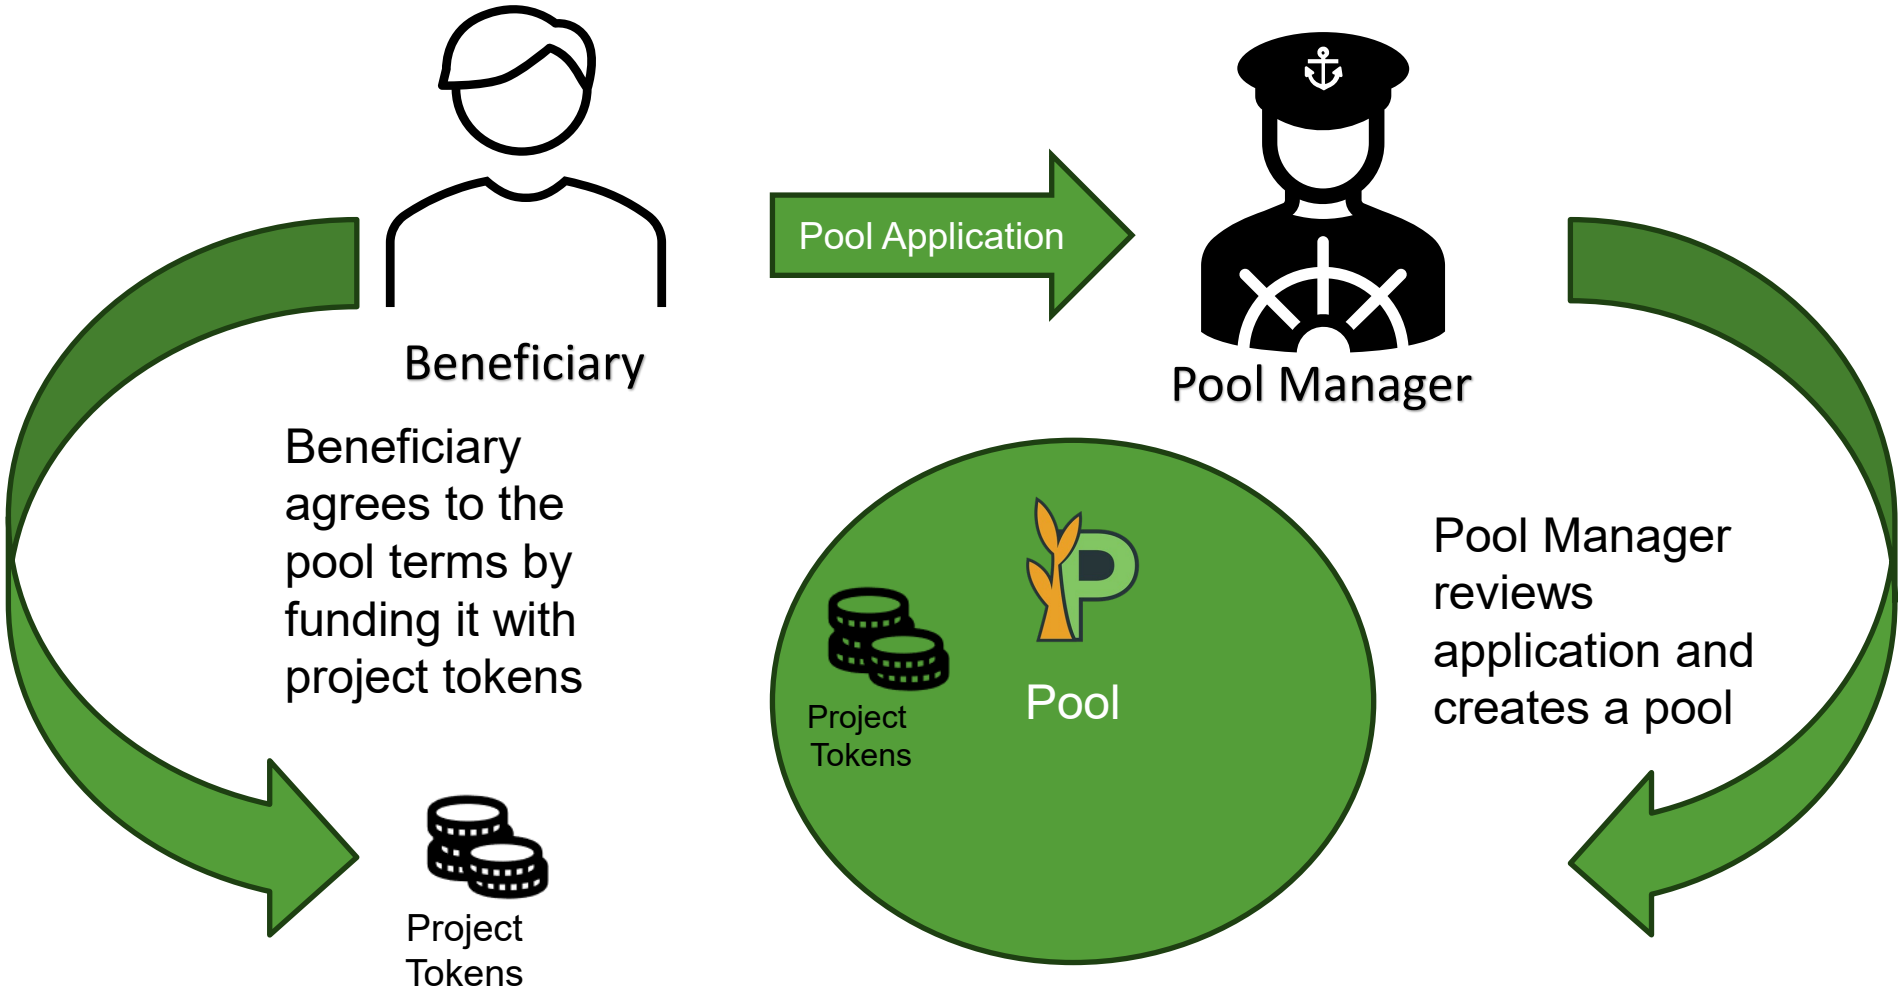


Liquidity Providers

Liquidity Providers buy pool positions.

©Copyright BennyFi Inc, 2019 - 2024. Confidential - Do Not Distribute

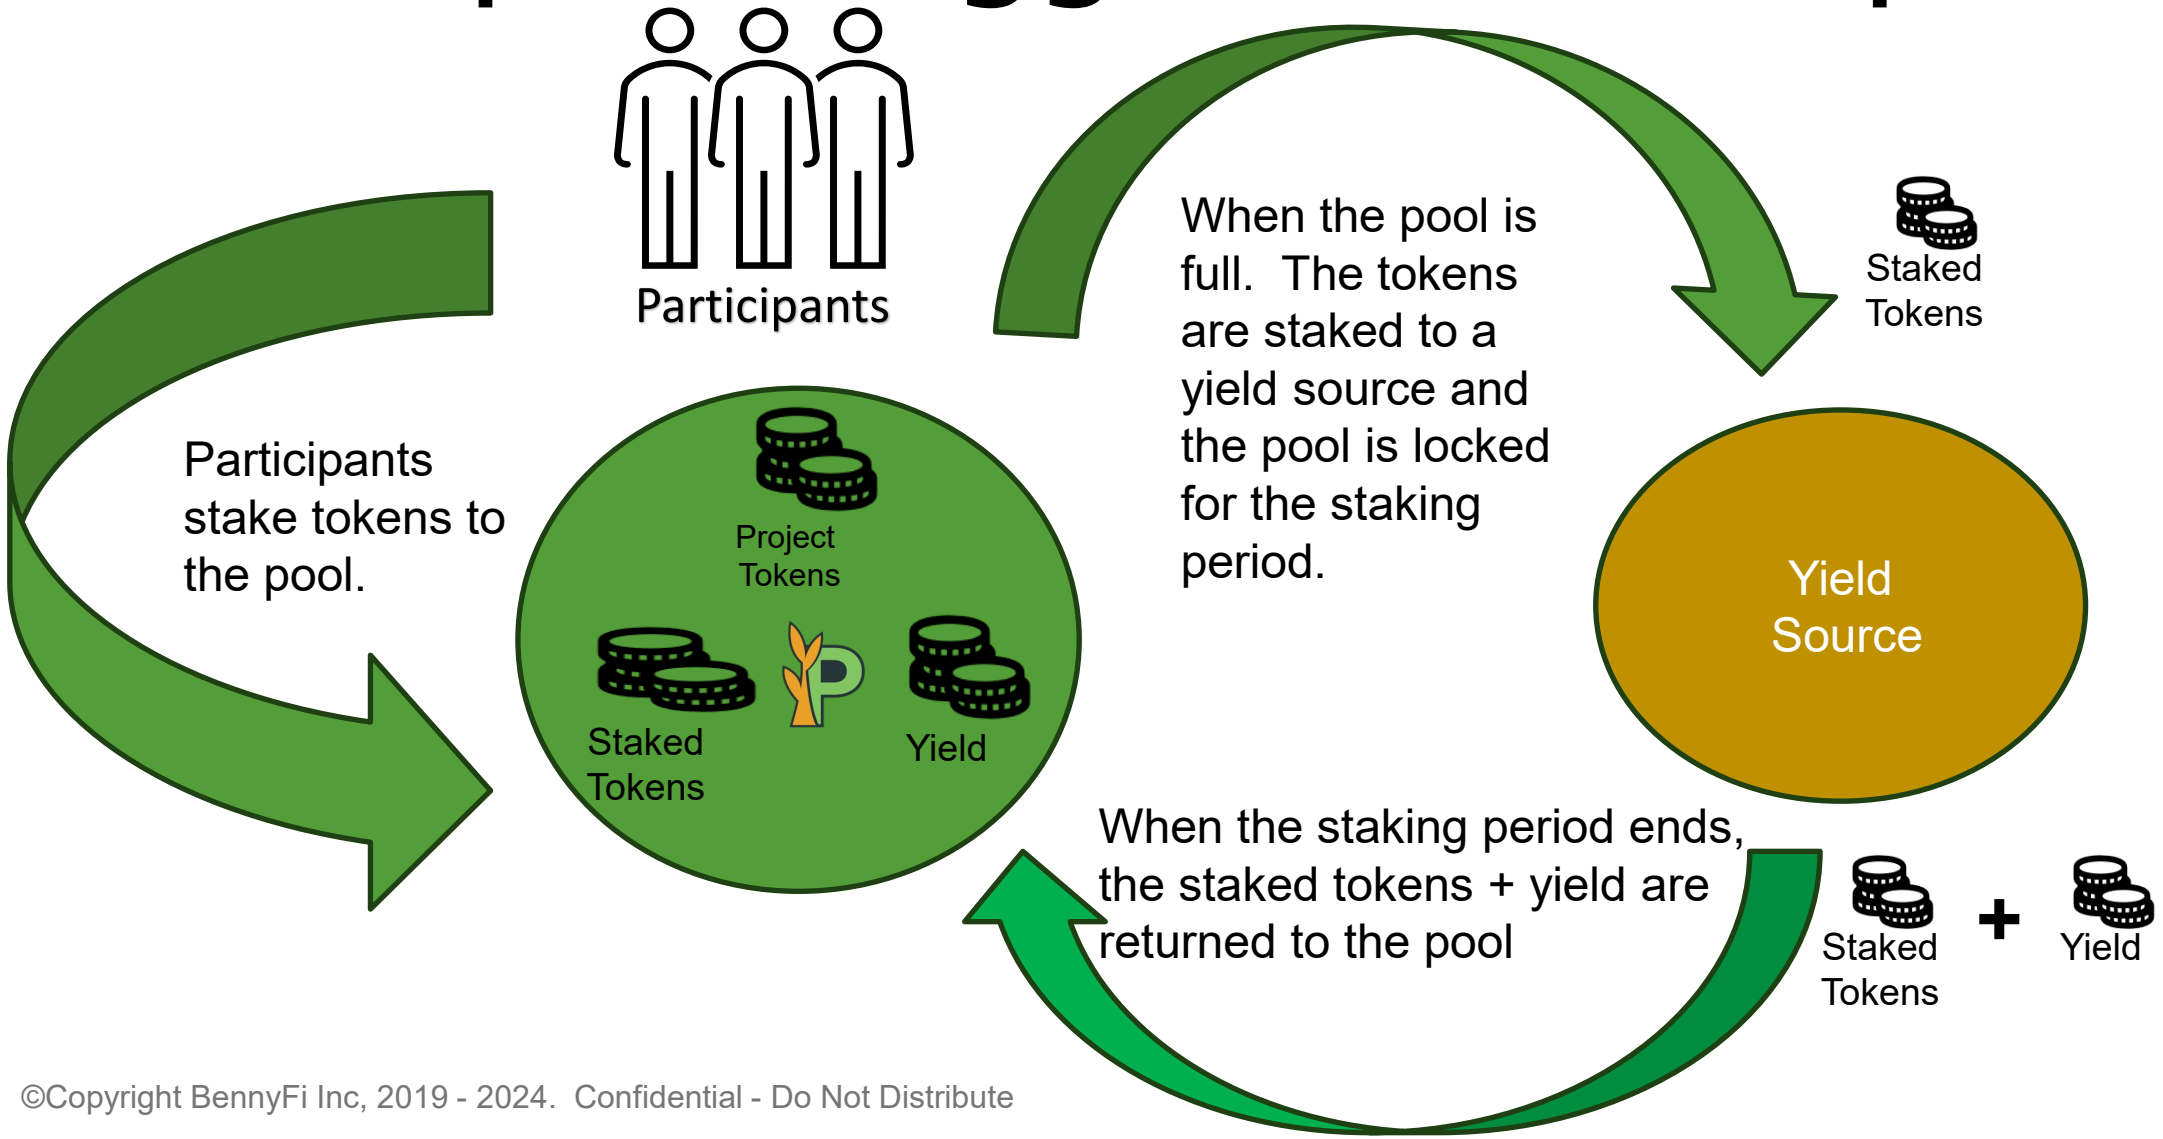
Step 1. Pool Creation



Beneficiary funding indicated agreement to the terms and opens the pool

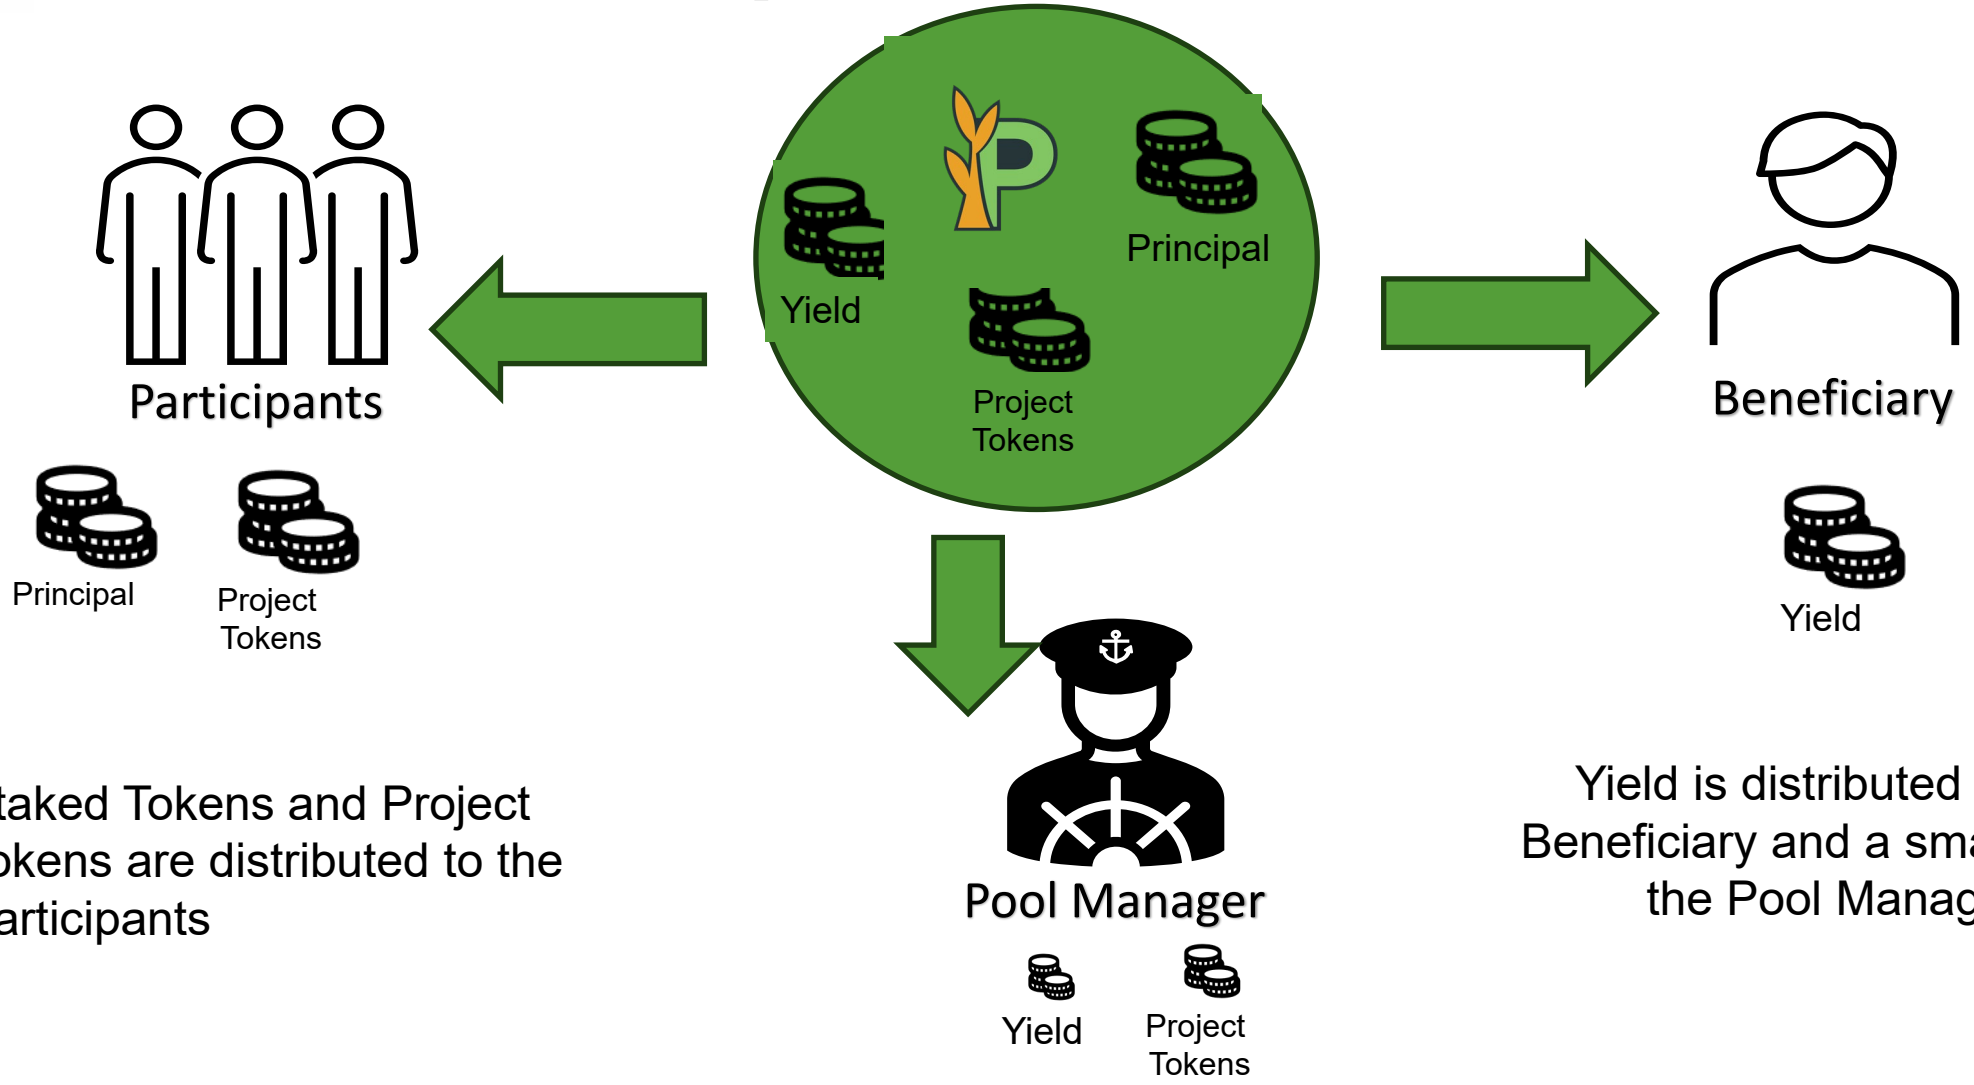
©Copyright BennyFi Inc, 2019 - 2024. Confidential - Do Not Distribute

Step 2. Aggerate Principal



©Copyright BennyFi Inc, 2019 - 2024. Confidential - Do Not Distribute

Step 3. Distribute



Staked Tokens and Project Tokens are distributed to the Participants

Yield is distributed to the Beneficiary and a small fee to the Pool Manager
